Re: Special revenue fund and fee adjustment proposal

Dear Mr. Icken:

Houstonians for Responsible Growth supports the creation of a Special Revenue Fund. We believe the SRF will ensure the City has dedicated and committed resources for development-related services. This important step can resolve problems with services that our members and the City have a joint interest in resolving. HRG understands that fees should align with the City's cost of service. We expect the City to continue to press for efficiencies in delivery of these services.

Most important to HRG is ensuring there is ongoing dialogue between the City and our customers, the development community, on the performance of services. We understand that the SRF will provide ongoing monitoring of service delivery and be accountable for the performance of these services. We look forward to working with you on this activity, and will be supporting the items 33 & 34 before Houston City Council on 12/22/15.

Sincerely,

Joshua Sanders, Executive Director
