

City of Houston Northeast Transmission Water Line (NETL)

NETL Summary

The 16.5 mile NETL will carry water produced by the planned expansion of the City's Northeast Water Purification Plant (NEWPP) to City and Regional Customers. Both the NETL and NEWPP expansion are needed to meet the Region's projected 2060 water demand. The NETL is also referred to as the Second Source Water Line, as it will be the second major transmission main delivering water from the NEWPP.

\$450 Million of Transmission Line Projects to be constructed from 2017 – 2021

In partnership with NHCROWA, CHCRWA, WHCRWA, NFBWA and the TWDB
